

CLAIMS

1. A cooking device with a muffle (11) delimiting a cooking chamber (10), at least an upper heating unit (12, 13), a hot-air heating unit (14) and a high-speed heating unit (15) for regulating a high-speed heating mode and with a control unit (16), characterised in that the control unit (16) adjusts the high-speed heating mode exclusively when operating with the hot-air heating unit (14) and at the same time switches on the upper heating unit (12, 13).
2. The cooking device as claimed in Claim 1, characterised in that the upper heating unit (12) switched on in high-speed heating mode is formed by an upper heating unit.
3. The cooking device as claimed in Claim 2, characterised in that the upper heating unit (12) is arranged inside the cooking chambers (10).
4. The cooking device as claimed in Claim 1, characterised in that the upper heating unit (13) switched on in high-speed heating mode is formed by a grill heating unit.
5. The cooking device as claimed in any one of the foregoing claims, characterised in that the control unit (16) adjusts the high-speed heating mode exclusively in a heating phase.
6. The cooking device as claimed in any one of the foregoing claims, characterised in that the high-speed heating unit (15) can be controlled manually via a switch (17).

7. The cooking device as claimed in any one of the foregoing claims, characterised in that a baking oven regulator (29) of the control unit (16) switches off the upper heating unit (12, 13), switched on in high-speed heating mode, whenever a set temperature is reached.
  
8. The cooking device as claimed in any one of the foregoing claims, characterised in that the control unit (16) with the upper heating unit (12, 13) switched on in high-speed heating mode activates at least one signal element (18).
